

# I-net logger

## *Temperature and humidity data logger for real time monitoring*

*Every unit has 2 temperature and humidity sensors  
Temperature and humidity real time monitoring*

### **Specifications**

**Measuring range 0% to 100 % rH, -40°C to 125°C**

**Sensor Accuracy :  $\pm 1.8$  % rH,  $\pm 0.2$  °C**

**Sensors : 2 Externals - Temperature and humidity**

**Sensor length : up to 20 m**

**LCD Display : shows informations– allows to set up recording parameters and alarms**

**Power : 220V**

**Memory : 100 000 recordings**

**Communication : Wifi or Ethernet port**

**Alarm : included + external port enabled for additional alarm**

**Recording frequency : from 1 second to 1 day**

**Data transmission to the web or network : from 1 second to 1 day**

**Data management : web platform or local readings through software**
